

1. Write a shell script to generate mark- sheet of a student. Take 3 subjects, calculate and display total marks, percentage and Class obtained by the student.

```
MINGW64:/c/Users/HP
HP@Hiteshri MINGW64 ~ (master)
$ echo "Student Report"
echo "Enter marks of English"
read m1
echo "Enter marks of Mathematics"
read m2
echo "Enter marks of Science"
read m3
total=$((m1+m2+m3))
percentage=$((total/3))
echo "Student : Total Marks = $total"
echo "Percentage = $percentage"
if [ $percentage -ge 75 ]; then
    echo "Class : Distinction"
elif [ $percentage -ge 60 ]; then
    echo "Class : First Class"
elif [ $percentage -ge 40 ]; then
    echo "Class : Second Class"
elif [ $percentage -ge 35 ]; then
    echo "Class : Third Class"
else
    echo "Class Fail"
fi
Student Report
Enter marks of English
78
Enter marks of Mathematics
90
Enter marks of Science
88
Student : Total Marks = 256
Percentage = 85
> Distinction|
```

2. Write a menu driven shell script which will print the following menu and execute the given task.
 - Display calendar of current month
 - Display today's date and time
 - Display usernames those are currently logged in the system
 - Display your terminal number

```

MINGW64:/c/Users/HP
HP@Hiteshri MINGW64 ~ (master)
$ display_menu() {
    clear
    echo "=====
    echo "          Shell Script Menu"
    echo "=====
    echo "1. Display calendar of current month"
    echo "2. Display today's date and time"
    echo "3. Display usernames currently logged in"
    echo "4. Display your terminal number"
    echo "5. Exit"
    echo "=====
    echo -n "Enter your choice (1-5): "
}
while true; do
    display_menu
    read choice

    case $choice in
        1)
            echo "-----"
            echo "Calendar of current month:"
            cal
            echo "-----"
            read -p "Press Enter to continue..."
            ;;
        2)
            echo "-----"
            echo "Today's date and time:"
            date
            echo "-----"
            read -p "Press Enter to continue..."
            ;;
        3)
            echo "-----"
            echo "Usernames currently logged in:"
            who | awk '{print $1}' | sort | uniq
            echo "-----"
            read -p "Press Enter to continue..."
            ;;
        4)
            echo "-----"
            echo "Your terminal number:"
            tty
            echo "-----"
            read -p "Press Enter to continue..."
            ;;
        5)
            echo "Exiting script. Goodbye!"
            exit 0
            ;;
        *)
            echo "Invalid choice. Please enter a number between 1 and 5."
            read -p "Press Enter to continue..."
            ;;
    esac
done

```

```

MINGW64:/c/Users/HP
=====
          Shell Script Menu
=====
1. Display calendar of current month
2. Display today's date and time
3. Display usernames currently logged in
4. Display your terminal number
5. Exit
=====
Enter your choice (1-5): 1
-----
Calendar of current month:
bash: cal: command not found

=====
1. Display calendar of current month
2. Display today's date and time
3. Display usernames currently logged in
4. Display your terminal number
5. Exit
=====
Enter your choice (1-5): 4
=====
Your terminal number:
/dev/pty0
=====
Press Enter to continue...|
```

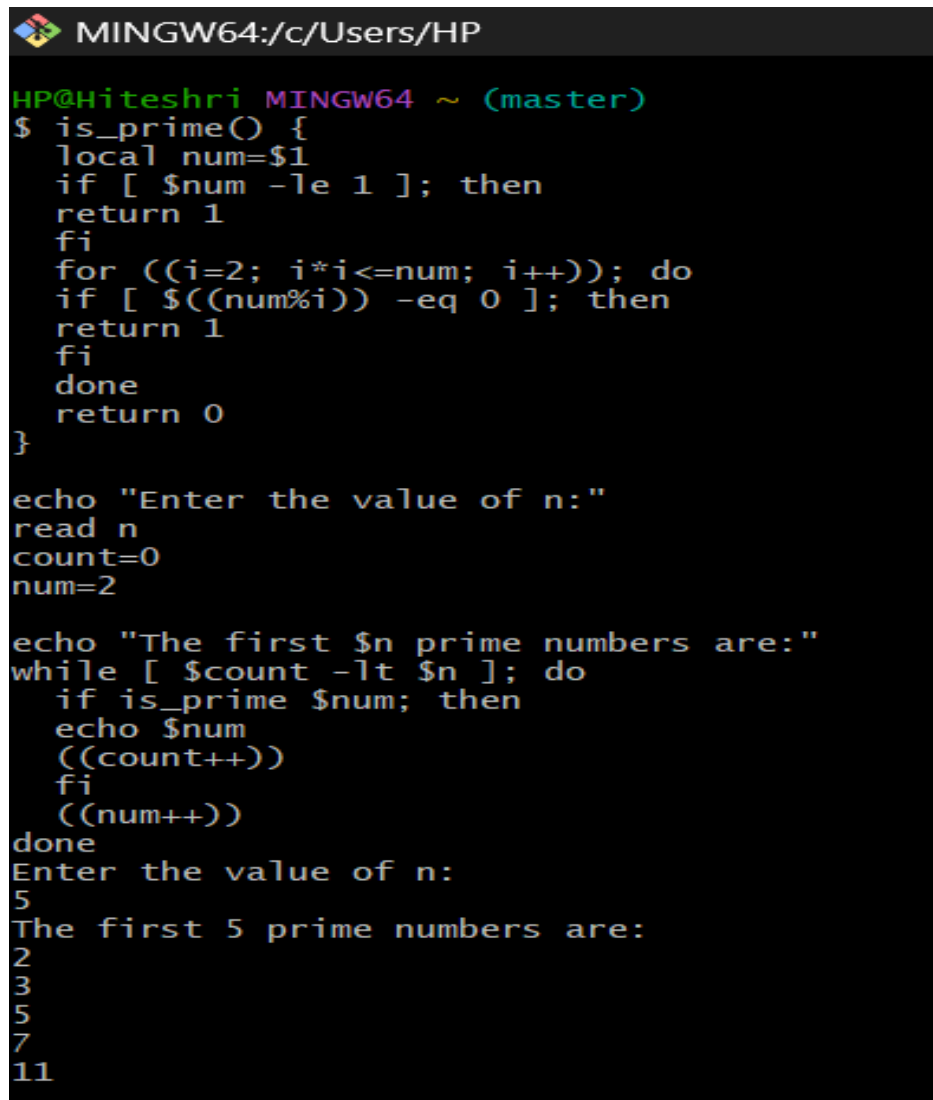

3. Write a shell script which will generate first n fibonacci numbers like: 1, 1, 2, 3, 5, 8, 13.

```
HP@Hiteshri MINGW64 ~ (master)
$ N=7
a=1
b=1

echo "The Fibonacci series is : "

for (( i=0; i<N; i++ ))
do
    echo -n "$a "
    fn=$((a + b))
    a=$b
    b=$fn
done
The Fibonacci series is :
1 1 2 3 5 8 13
```

4. Write a shell script which will accept a number b and display first n prime numbers as output.

```
MINGW64:/c/Users/HP
HP@Hiteshri MINGW64 ~ (master)
$ is_prime() {
  local num=$1
  if [ $num -le 1 ]; then
    return 1
  fi
  for ((i=2; i*i<=num; i++)); do
    if [ $(num%i) -eq 0 ]; then
      return 1
    fi
  done
  return 0
}

echo "Enter the value of n:"
read n
count=0
num=2

echo "The first $n prime numbers are:"
while [ $count -lt $n ]; do
  if is_prime $num; then
    echo $num
    ((count++))
  fi
  ((num++))
done
Enter the value of n:
5
The first 5 prime numbers are:
2
3
5
7
11
```

5. Write menu driven program for file handling activity

- Creation of file
- Write content in the file
- Upend file content
- Delete file content

MINGW64:/c/Users/HP

```
$ clear_screen() {
    printf "\033c"
}
create_file() {
$ clear_screen() {
    printf "\033c"
}
create_file() {
    read -p "Enter filename to create: " filename
    if [ -e "$filename" ]; then
        echo "Error: File '$filename' already exists."
    else
        touch "$filename"
        echo "File '$filename' created successfully."
    fi
}
write_file() {
$ clear_screen() {
    printf "\033c"
}
create_file() {
    read -p "Enter filename to create: " filename
    if [ -e "$filename" ]; then
$ clear_screen() {
    printf "\033c"
}
create_file() {
    read -p "Enter filename to create: " filename
    if [ -e "$filename" ]; then
        echo "Error: File '$filename' already exists."
    else
        touch "$filename"
        echo "File '$filename' created successfully."
    fi
}
write_file() {
    read -p "Enter filename to write to: " filename
    if [ -f "$filename" ]; then
        echo "Enter content (Ctrl+D on a new line to save):"
        cat > "$filename"
        echo "Content written to '$filename'."
    else
        echo "Error: File '$filename' not found. Use option 1 to create it first."
    fi
}
append_file() {
    read -p "Enter filename to append to: " filename
    if [ -f "$filename" ]; then
        echo "Enter content to append (Ctrl+D on a new line to save):"
        cat >> "$filename"
        echo "Content appended to '$filename'."
    else
        echo "Error: File '$filename' not found."
    fi
}
delete_file() {
    read -p "Enter filename to delete: " filename
    if [ -f "$filename" ]; then
        read -p "Are you sure you want to delete '$filename'? (y/n): " confirm
        if [[ "$confirm" == [yY] || "$confirm" == [yY][eE][sS] ]]; then
            rm "$filename"
            echo "File '$filename' deleted."
        else
